# Cleaning belt

- 1. Use a coin or flat-head screwdriver to turn the screw, open the casing, and remove the roll paper tube and reel.
- 2 . Remove the cleaning tape from the reel and the paper roll, load the new cleaning tape on the reel, pass one end of the cleaning tape through the roller, wiper, and the roller to connect to the reel and fix it with tape.
- 3 . Place the reel and paper roll loaded with the new cleaning tape in the corresponding position, and close the casing again.

## Optical fiber cleaner instruction

#### Product description

The optical fiber cleaner is an important and indispensable accessory for maintaining and ensuring the quality of the optical fiber connection. It can be used to clean the end faces of the optical fiber connector of various adapters simply and quickly. It is a non-alcohol cleaning method. The fiber cleaner is a suitable for cleaning the end face of the fiber connector ferrule. It is easy to use, can replace the cleaning tape, and provides low-cost cleaning. Applicable connector models are: SC, FC, MU, LC, ST, D4, DIN, etc.

#### Product features

- Use non-alcohol special ultra-fine fiber.
- The cleaning effect is fast and effective.
- Hand-controlled operation, lightweight design, replaceable belt Cleaning the end face of the fiber connector ferrule.
- The cleaning belt is made of high-density textile fibers.
- Suitable for FC/SC/LC/ST/MU/D4/DIN.
- Portable, drop-proof, suitable for different environments.
- Up to 500 cleaning times.

# 7

### Products specification

Dimension	125*85*35mm
Material	Special microfiber + high-grade plastic
Scope of application	FC/SC/LC/MU/D4/DIN and other fiber optic connectors
Cleaning ability	500+ times

#### Use environment

 Operating environment altitude: areas below 2000m above sea level.
